

Adhesion Microscope Slides

Super White Glass · Positive Charged · PCL / PCI
Ideal for Histopathology · Cytology · IHC

IVD

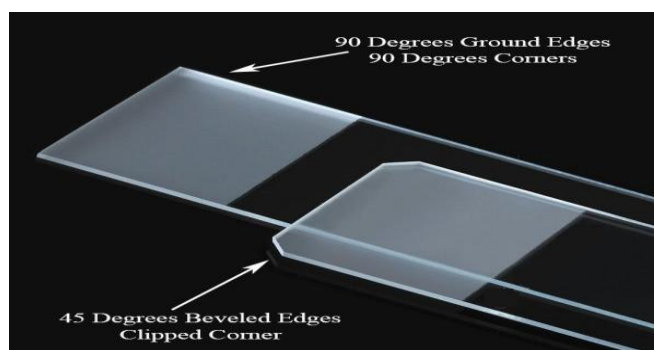

◆ Premium Quality · Laboratory Tested · IVD Compliant · CE Marked ◆

BioMolds Adhesion Microscope Slides are engineered for superior tissue adhesion, optical clarity and consistency — purpose-built for advanced diagnostic and research laboratories. Each slide features a uniform positive-charge coating for reliable specimen retention throughout the complete staining workflow.

■ Product Variants ■

PCL Slides – 45° Corners

PCI Slides – 90° Corners

PCL Slides

45° Corners · Positive Charged

Glass Type	Super White Glass
Dimensions	25 × 75 mm
Thickness	1.0 – 1.2 mm
Corners	45°
Surface	Positive Charged
Cleaning	Pre-cleaned
Printing	Thermal Transfer
Quantity	50 pcs / pack

PCI Slides

90° Corners · Positive Charged

Glass Type	Super White Glass
Dimensions	25 × 75 mm
Thickness	1.0 – 1.2 mm
Corners	90°
Surface	Positive Charged
Cleaning	Pre-cleaned
Printing	Thermal Transfer
Quantity	50 pcs / pack

• IVD Compliant

• CE Marked

• Uniform Coating

• Auto-Stainer Compatible

■ Why Choose BioMolds? ■

ADH

Superior Adhesion
Uniform +charge coating
for reliable retention

OPT

Optical Clarity
Super white glass for
transparency & true colour

LAB

Lab Ready
Pre-cleaned, compatible
with auto-staining systems

25×75

Precise Dimensions
25×75mm ±0.2mm,
ground edges, safe grip
